

CHILDHOOD CANCER STAR ACT PASSES CONGRESS!

The Childhood Cancer Survivorship, Treatment, Access & Research (STAR) Act just passed Congress by unanimous consent. This is a huge win for children with brain tumors and the entire pediatric cancer community. The STAR Act will now move to the President's desk to be signed into law!

The [Childhood Cancer STAR Act](#) will help stimulate more effective pediatric brain tumor research and could lead to better treatments that extend life and improve patients' quality of life.

This progress would not have been achieved without the wonderful, relentless work of YOU - our tireless advocates - and the generous support from so many people across the brain tumor community.

Thank you for leading the fight against brain tumors!

National Brain Tumor Society is fiercely committed to finding better treatments, and ultimately a cure, for people living with a brain tumor today and those who will be diagnosed tomorrow. This means effecting change in the system at all levels. It's time to build on progress and transform tomorrow today.
