

HONOR, LEARN, AND ACT

GBM AWARENESS DAY 2020

GLIOBLASTOMA IS

the most common primary, malignant brain tumor.

the deadliest primary, malignant brain tumor.

accounted for 48% of all primary, malignant brain tumors.

An estimated more than 10,000 people in the United States die from a GBM each year.

An estimated 13,140 people in the United States will be diagnosed this year.

AND YET

the 5-year survival rate for a GBM patient is only 6.8%.

the mean survival for a GBM patient is only 12-18 months.

it affects 3% of pediatric brain tumor patients.

SURVIVAL RATES AND MORTALITY STATISTICS FOR GBM HAVE BEEN VIRTUALLY UNCHANGED FOR DECADES.

AND WITH SUCH LIMITED PROGRESS MADE IN TREATING THESE AGGRESSIVE AND COMPLEX TUMORS, THE TIME TO ACT IS NOW.
