

SURVIVORSHIP: KEY QUESTIONS

SURVIVORSHIP

What is my plan for long-term follow-up care and appointments?

How will my quality of life and palliative care be addressed at this point?

What are long-term side effects I could experience?

When will I be able to return to work? Will I need any accommodations? Do you have any information for my employer/HR team that will help them support me at work?

Will I need to navigate long-term Social Security Disability Insurance (SSDI) and who can help me do that?

Is there a social worker on staff that can provide guidance and assistance?

Can I drive or will I be able to drive eventually? What do I need to do to be cleared to drive again? Can you recommend any local transportation assistance programs?

Can you suggest support groups, financial assistance services, and/or a cancer resource center in the area for myself and my caregiver?

Where can I, my caregiver and family find mental health support services?
