

Research Roundtable: Turning Insight into Action

Driving Impact, Collaboration, and Solutions in Brain Tumor Research

National Brain Tumor Society's (NBTS) Research Roundtable brings together leaders from industry, academia, and government to tackle the most urgent challenges in brain tumor research through **actionable, collaborative solutions that drive progress** for the brain tumor community.

Brain tumors remain among the **most complex and treatment-resistant cancers**, demanding coordinated, cross-sector approaches. The Roundtable is designed for action, not just dialogue—a hands-on forum where members **identify gaps, spark innovation, and shape the future of neuro-oncology**.

Past Roundtables have led to:

- Greater understanding of flexibility in clinical trial design and dose optimization
 - Progress in biomarker development and liquid biopsy implementation
 - Adoption of new response assessment guidelines
- Momentum toward validated use of external control data in clinical trials

Corporate Industry Membership

As a Research Roundtable member, you'll have the unique opportunity to:

- **Engage directly with FDA, NIH, and other leaders** in a collaborative, informal environment to influence emerging regulatory and scientific priorities.
- **Contribute industry perspective** to shape solutions that accelerate therapy development.
- **Catalyze meaningful collaborations** between academia and industry to close research gaps.
- **Contribute to publications and white papers** that influence priorities and standards across the field.
- **Integrate the perspective of patients and care partners** into research strategies through NBTS's extensive patient insight data.

Corporate Industry Membership Options

All Research Roundtable members receive the following:

Membership Benefits

- One (1) representative invited to attend two (2) Research Roundtable meetings within the 12-month membership period, as scheduling permits
- One (1) representative appointed to the Steering Committee
- One (1) representative appointed to one (1) Content Committee per year

Recognition and Visibility

- Logo on the Research Roundtable webpage
- Recognition during opening remarks at Research Roundtable meetings
- Logo on welcome signage at the in-person meeting
- Logo on membership acknowledgement slide during meeting presentations
- Opportunity to share a company bio with all Research Roundtable participants
- Recognition as a national partner on NBTS's Corporate and Foundation Partners webpage

Membership levels are based on a company's progress in brain tumor-related products or technologies.

Discovery: \$10,000

Reserved for early-stage companies developing brain tumor-related products or therapies with no commercial products. Connect with leaders across sectors to gain insights that support early-stage development and innovation, and benefit from regulatory discussions and context, providing valuable guidance for long-term development strategies.

Breakthrough: \$15,000

Reserved for companies with commercial products in other disease areas, but in pre-commercial stages for brain tumor-related products or therapies. Gain early exposure to cross-sector discussions that inform development strategies and future brain tumor programs, and learn from regulatory perspectives and trends, helping your company prepare for eventual commercialization in brain tumor therapies

Visionary: \$25,000

Reserved for established companies with commercial brain tumor-related products or therapies. Access strategic insights and cross-sector perspectives that support ongoing brain tumor programs, and engage with regulatory leaders and discussions to better understand evolving policies and priorities shaping brain tumor research and development

Add-On Option: \$5,000

Available to all membership levels. Add one (1) additional virtual participant to attend two (2) Research Roundtable meetings within the 12-month membership period.
